

SCP REPROCONTROL FOR HP

THE NEW GENERATION OF DIGITAL REPRO-MANAGEMENT

SCP reprocontrol for HP is powerful software that lets you flexibly automate, standardize, and manage color consistently within your workflow. Quick preflight preparation reduces errors and results in less ink and paper waste. Print settings can be automated, mixed print jobs easily handled, and file submission and configurations managed remotely. This increased control helps reduce print costs, increase productivity, enables new services to be offered and thereby helps increase profits.

User friendly and accessible

- Easy installation means you are up and running in a few minutes.
- Easy-to-use interface means your operator is quickly productive.

Perfect results

- Full color RIP for optimal color control giving perfect results first time around.
- Professional preview/rotate/edit functionality to ensure the correct print job settings.

Boost your productivity

- Unlimited job capacity.
- Clustering your printers (making multiple printers work as one) streamlines sending projects to different printers.
- Collated set printing.
- Print queue job monitoring for further flexibility.
- Unlimited input queues to automate default job settings.
- Specially created for print professionals, it supports all major file formats such as HP-GL/2, PDF, DWF, and raster files.

Increased business success

- Cost tracking to help you monitor costs on a print-by-print basis and view customer accounts quickly and easily.
- Peace of mind with true end-to-end solutions for your business.
