HP DESIGNJET T1200 PRINTER SERIES

## MORE FORMATS

### Large format printing was never so easy.

HP Instant Printing Utility 3.0 lets you conveniently print files in large format, whether these are architectural or mechanical designs, or whether you are working in MS Office 2007 (Word, Excel, Powerpoint). Just straight from your desktop.

HP-GL/2 is a standard file format developed by HP for CAD applications that is generated when choosing the "Print to file" option and includes all print job settings, ready to reprint.

## MORE CONVENIENT

- Just right-click one or more files and select HP Instant Printing Utility to send them to any HP large format printer that is installed in your printer folder.
- You can use HP-GL/2 files as proofs of your printed CAD projects and reprint them easily.
- Avoid possible errors—wasting time and media —by using HP Instant Printing Utility 3.0 scaling, rotate, and real-time print preview features.

## FASTER

- Save time printing in-house and eliminate expensive outsourcing and delivery.
- Process HP-GL/2 and PDF\* even faster using the memory in the printer and free up your computer.
- Continue working without interruptions, concentrating on your core tasks and design work.

## MORE RELIABLE

- The software is optimized to avoid network traffic jams that may compromise print quality by significantly reducing the file size sent to the printer.
- Get the same results on any HP Designjet and avoid trial and error.
- Works with most of the nearly 2,000,000 Designjets that HP has sold in its 25 year history of large format printing.

### HP Instant Printing Utility 3.0 supports:

- HP Designjet 510 Printer series
  - HP Designjet T1200 Printer series
  - HP Designjet T770 Printer series
  - HP Designjet T620 Printer series
  - HP Designjet T1120 Printer series
  - HP Designjet 4020/4520 Printer series
  - HP Designjet T1120 SD-MFP / T1120 HD-MFP
  - HP Designjet 4520 HD-MFP
- and many other HP Designjet printers.

For a full list of supported printers, please visit

[www.hp.com/go/hpinstantprintingutility](http://www.hp.com/go/hpinstantprintingutility)

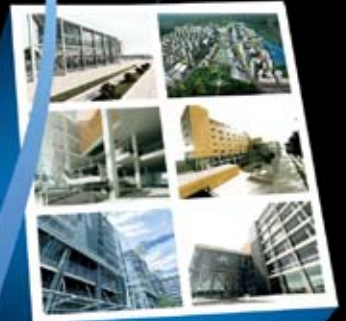

\* PDF works with all supported printers, but uses the built-in memory only for PS embedded units.

\*\* PPT files require Microsoft® PowerPoint to be installed
