Media, Ink and Printheads

FOR CANON LARGE FORMAT PRINTERS

We Speak Image

Achieve the greatest reward for your creativity

## Some things work better together.

Do you want the highest quality prints and worry-free reliability? Then use inks and media designed to work in perfect harmony with your Canon Large Format Printers.

**Hardware, inks and media designed to work in harmony.**

### Big benefits with Canon

Image matters to us. It's been the driving force of our business since we started making cameras in the 1930s.

Canon's Large Format Printing solution of today is the result of painstaking research and development into hardware, software and consumables - a journey that started over 30 years ago when inkjet technology was actually invented by a Canon engineer in the 1970s.

For the best performance you need products that have evolved through this process, products designed to work together in perfect harmony like Canon comprehensive range of consumables. Inks and medias that can produce consistent accuracy, wide colour gamuts, minimize bronzing and deliver exceptionally reliable results when used with your Canon Large Format Printers.

## Brilliant inks

LUCIA Inks are the Canon developed pigment inks that can be found in our range of Graphic Art imagePROGRAF large format printers for the Photo, Fine Art, Proofing and Production market. The LUCIA inks boast a wide colour gamut and deliver smooth gradation, reduced graininess and improved metamerism. The LUCIA inks also offer 120 years of lightfastness.

Canon's breakthrough 5-colour dye/pigment Reactive Ink technology, employed in our imagePROGRAF CAD / GIS series of printers, is developed specifically for printing detailed business documents and engineering applications. The unique formulation improves the ink's adhesion to the media and minimizes colour "bleeding". The result is clearer text, smoother curves and sharp fine lines, even on uncoated technical papers. Scratch and marker resistance is also improved, so prints are more durable than when printed with conventional dye inks.

## FINE technology

All our inks are designed to work hand-in-hand with Canon's FINE technology, incorporated within the print heads. FINE eliminates the problem of inconsistent ink placement that can result from the use of minute ink droplets. Ink bubbles are formed at the top of the nozzle to separate and eject the ink. A heater then ensures precise uniformity in droplet size during ejection for brilliant and consistent results print after print.

Canon's FINE technology uses ink bubbles that are formed at the top of the nozzle to separate and eject the ink.

## Your guarantee of quality and consistency

Achieve the greatest reward for your creativity

**A huge choice of media**  
ensures you deliver the prints your  
customers' demand.

**Make the right choices  
for brilliant prints.**

#### Canon's wide range of media

A wide diversity of media ensures you can bring all your visions to life – whatever the application. Over 40 different substrates are available in a variety of weights and media thicknesses. However ambitious your customers are, however creative you want to be, Canon's media gives you the confidence to deliver.

#### Comprehensive testing

In order to become part of Canon's LFP media portfolio each media type, in every available size, undergoes a rigorous quality assurance testing procedure. Each specific media type must demonstrate the highest quality of prints that are consistent over long periods. Quality must be accompanied by trouble-free operation and stringent environmental and safety standards must also be met. Only once these criteria are satisfied can a product form part of the Canon LFP media portfolio.

## PHOTOGRAPHY & FINE ART

## CAD / GIS

## PROOFING

## GENERAL USE

### Solutions for every application

Whatever you need to create you can do it with Canon Media. Specialist medias, for use in general and niche applications, ensure that every creative possibility is within your reach.

### Production

Produce head turning signs, posters and graphics for use in a wide choice of applications. Glossy and Satin papers, roll-up films, backlit films, textiles and more.

### Photography and Fine Art

Create Fine Art masterpieces with amazing detail on Art Canvas or Premium Art Paper. Or why not generate large-scale photos on an extensive range of specialist photo papers that come in a variety of weights and finishes including pearl, glossy and satin.

### CAD / GIS

Bring the most detailed plans to life using matt coated or uncoated stocks designed for outstanding reproduction.

### Proofing

For accurate proofs with perfect colour matching every time there's a wide choice of proofing papers.

### General Use

If you're using your large Format Printer to find new ways to generate impactful communication in your office, there's a huge array of media to choose from. Let your imagination run wild and print posters on vinyl or backlit film.

### Big benefits for you:

- Outstanding choice
- Variety of roll-widths
- Non-stop runnability
- Specialist applications
- Environmentally responsible
