

HP Double Matte Film, 3-in Core for HP PageWide Technology

The HP large format printing system—the complete solution

HP PageWide XL printers, Original HP PageWide XL pigment inks and printheads, and Original HP printing materials are designed to work together as a system to provide reliable, consistent results with every print.

Give your ideas a photo-realistic finish

Accomplish more with consistent results every time

Keep your projects on track and demonstrate the quality and professionalism of your work with this 5-mil, double matte polyester film. Print dimensionally stable, durable, translucent images with sharp, dense lines and consistent, vivid color.

Versatile double matte surfaces

Look to this high-quality film to present your professional best. The matte print surface is engineered so your prints dry quickly and resist smudging and smearing. This dynamic matte surface helps prevent lines from bleeding and promotes strong ink adhesion to help prevent ink transfer when stacking sheets or overlaying drawings. The reverse surface is treated to minimize static buildup and accept manual edits with pencil or ink.

Keep a brisk pace from one project to the next

Meet your project deadlines. Optimized for high-speed HP PageWide XL printers and compatible with Original HP dye- and pigment-based inks, this matte film provides consistent, high-quality images, print to print and roll to roll. The polyester film base is dimensionally stable and durable to help prevent tearing in high-speed production equipment.

Print with the environment in mind

Help meet the environmental objectives of your company—and your clients. HP Double Matte Film, 3-in Core for HP PageWide Technology is recyclable.¹
