

Photo Papers Heavyweight

Photo Satin Heavyweight 260gsm OLM61

Description:

This Ultra White Photo RC inkjet paper provides excellent image quality, on its smooth satin surface. Its Microporous coating is touch dry when printed and water resistant. It is ideal for a more subtle finish but still gives the same saturated colours and great tonal range as our gloss heavyweight.

Applications include; Photography, portrait printing, posters and graphic art reproduction

| | |
|---|--|
| Weight (GSM) | 260 |
| Base Material | Resin Coated |
| Coating Type | Microporous Satin |
| Surface Texture | Smooth Satin |
| Thickness (Microns / inches) | 265 / 0.016 |
| Whiteness (CIE) | 152 |
| Brightness (TAPPI) | 112 |
| OBA content | Yes |
| pH | 7.5-9.5 |

| Recommended printer Settings | Photo black inks with generic media setting of 'Photo Semi-gloss heavyweight' / 'Premium Photo paper Semi-matte' or similar. ICC colour profiles are available from the website. |

Directions for Use:

Paper Handling:

- Avoid touching the coated surface of the paper before and after printing, and wear cotton gloves if necessary.
- Avoid exposure to high temperatures, high levels of humidity and moisture. These factors can affect the drying time of some OlmecTM products.

Paper Storage:

- Remove prints from the tray after printing; do not allow them to be stacked.
- Prints should be allowed to dry in air, preferably left uncovered for 24 hours to allow the residual liquid from the inks to evaporate.
- In cases where stacking is unavoidable, a paper interleaf should be placed between each print.

Conditions of Use:

- Where possible, all paper should be stored and used within the following range of environmental conditions:
Temperature = 10° - 35° Centigrade
Relative Humidity = 30% - 80%
- Unused paper should be stored in its original packaging, out of direct sunlight under normal climatic conditions.
