Recommended printer Settings	Photo black inks with generic media setting of 'Photo semi-gloss heavyweight' / 'Premium Photo paper semi-gloss' or similar. ICC colour profiles are available from the website.

#### Directions for Use:

#### Paper Handling:

- Avoid touching the coated surface of the paper before and after printing, and wear cotton gloves if necessary.
- Avoid exposure to high temperatures, high levels of humidity and moisture.
  These factors can affect the drying time of some Olmec™ products.

#### Paper Storage:

- Remove prints from the tray after printing; do not allow them to be stacked.
- Prints should be allowed to dry in air, preferably left uncovered for 24 hours to allow the residual liquid from the inks to evaporate.
- In cases where stacking is unavoidable, a paper interleaf should be placed between each print.

#### Conditions of Use:

- Where possible, all paper should be stored and used within the following range of environmental conditions:
   Temperature = 10°- 35°Centigrade
   Relative Humidity = 30% - 80%
- Unused paper should be stored in its original packaging, out of direct sunlight under normal climatic conditions.
