TEXBANNER PRO 370 MATT

matt 3269, 355 µm

Lightweight, non-woven banner for short-term indoor and outdoor applications

The 100% synthetic fleece banner with good tensile strength and tear resistance is suitable for short-term indoor and outdoor applications. The ultra-white fleece banner for solvent or latex inks is not only ideal for use as an advertising banner or hanging banner at trade fairs or exhibitions, but also as low-cost roll-ups, signage or banners at sporting events. It is also an optimum, cost-effective alternative to Tyvek®. The natural look of the flexible and durable material is underlined by its textile character. Prints impress with bright and vivid colours.

Advantages

- Brilliant colour reproduction
- High dimensional stability
- Splashproof prints for short-term outdoor applications
- Can be stapled, sewn or fitted with eyelets
- PVC-free and recyclable

General tips

For quality reasons the media should be stored and converted under conditions of 30-65% relative humidity at a temperature of 10-30°C / 50-86°F.

Recommended profile for HP L360:
HP Professional Gloss Photo Paper, 16 passes
