

ARIANA BACKLIT HEAVY 230

matt 3365, 235 µm

Durable backlit film for lightbox advertising

This matt coated, transparent polyester film for aqueous ink systems is ideal for use in lightbox systems in indoor and outdoor applications. Thanks to its high ink absorption properties, especially with HP Z-series printers, it enables prints with high covering capacity, colour brilliance and contrast in both reflected and transmitted light. The prints are especially robust and scratch resistant. Ariana Backlit is also suitable for use in environments with high humidity and condensation. Antistatic treatment makes printing on this film easier. The thickness of 230 µm enables particularly efficient placement in lightboxes.

Advantages

- Outstanding brilliance in reflected or transmitted light
- Splashproof prints with pigment inks
- Good scratch resistance
- High rigidity
- High dimensional stability
- Antistatic backing

General tips

The converting and storage should take place in a climate from 35 to 65% to relative humidity at a temperature from 10 to 30°C. Keep the product in the original packaging (cardboard box and PE bag). It is always recommended that cotton gloves be used when handling InkJet coated materials to avoid fingerprints.

Physical data

Name	Value	Norm
Thickness (film) [µm]	235	ISO 4593
Weight [g/m ²]	290	ISO 536
Opacity [%]	75	ISO 2471

Technologies

Properties

The values stated above are only for orientation. Before using our print media please check its compatibility for your printer and the intended application. We cannot be held responsible for any mistakes resulting from technically modified printers and/ or inks. Product design changes to our products technical developments may be carried out without prior notice.
