WELCOME TO XATIVA

Established in 2000, the Xativa media brand now offers one of the biggest and best selections of specialist high quality media ranges on the market. With over 1900 products available, our collection incorporates all the major indoor and outdoor printing applications across a broad spectrum of printing technologies such as solvent, latex, and aqueous-based ink. What is more, we are going to go on expanding it in future as more and more new applications come on to the market.

This brochure shows our complete collection of media products broken down into five application categories. You will see the details of each range and the products it includes, to give you a comprehensive introduction to the world of Xativa media.

In addition, you will also be pleased to know that the Xativa brand is part of a fully ISO 14001 Environmental Management System certified business. This means that you have complete peace of mind in knowing that all Xativa products fully comply with their relevant industry standards and are reviewed regularly to ensure that they stay compliant.

CAD AND TECHNICAL MEDIA

Our CAD and Technical range of media has been specifically created to meet the needs of architects, engineers, and designers, and helps you achieve superb results from 2D line drawings to full colour 3D renders and presentations. The range is compatible with all wide-format printers using aqueous ink and offers you a choice of width sizes. In short, the Xativa CAD and Technical Media range includes the full range of products for this application sector.

- Uncoated white papers suitable for both monochrome and colour draft plots, giving fine line sharpness for small area fills available in a range of weights
- Matt film with an erasable surface that allows for redraw in pen, pencil, or marker
- Tracing paper designed for reproducing final drawings that are exceptionally durable. It produces archivable crisp blacks and coloured lines

Colour Inkjet Paper

XCIJP80

A 80gsm uncoated white paper suitable for both monochrome and colour draft plots. Good dot gain control giving fine line sharpness for small area fills.

FINE ART AND PHOTO REPRODUCTION MEDIA

Our Fine Art and Photo Reproduction media are compatible with all wide-format printers using aqueous ink and are available in a range of width sizes. The range also includes art papers, canvases and portfolio materials which have been developed to give consistently high-quality results to meet the exacting demands of original artwork reproduction. In addition, critical proofing applications are covered by our FOGRA certified media ensuring results of the highest quality possible.

Our Fine Art and Photo Reproduction media are compatible with all wide-format printers using aqueous ink and are available in a range of width sizes.

The range includes:

- Instant dry papers in a range of weights with finishes including glossy, satin and lustre
- FOGRA-certified resin coated proofing grade media in gloss and satin
- Coated canvas for high quality graphic art printing also suitable for indoor banners
- High white textured canvas paper for cost-effective photo and art prints
- Smooth and textured high white archival 100% cotton paper which is acid and lignin free. The media delivers excellent colour gamut and exceptional D-max
