Recommended printer Settings	Photo black inks with generic media setting of ‘Premium Photo Gloss’ / ‘Premium Photo paper Semi-matte’ or similar. ICC colour profiles are available from the website.

Directions for Use:

Paper Handling:
- Avoid touching the coated surface of the paper before and after printing, and wear cotton gloves if necessary.
- Avoid exposure to high temperatures, high levels of humidity and moisture. These factors can affect the drying time of some Olmec™ products.

Paper Storage:
- Remove prints from the tray after printing; do not allow them to be stacked.
- Prints should be allowed to dry in air, preferably left uncovered for 24 hours to allow the residual liquid from the inks to evaporate.
- In cases where stacking is unavoidable, a paper interleaf should be placed between each print.

Conditions of Use:
- Where possible, all paper should be stored and used within the following range of environmental conditions:
  Temperature = 10°- 35°Centigrade
  Relative Humidity = 30% - 80%
- Unused paper should be stored in its original packaging, out of direct sunlight under normal climatic conditions.

All recommendations and product indications are for your guidance, and are subject to our test criteria.
